

Village of Northport
Waterfront Committee
Regular Meeting plus ZOOM
July 19,2022 1 P.M.

Member's present: Cook, Gremel, Harper

Staff present: Rosemurgy

PUBLIC COMMENT: None

AGENDA:

1. Presentation by Luke and Jesse Yeates regarding a commercial captained sailboat charter business. The *Alecona* is a 47' steel-hulled vessel, currently in Ecuador, but hopefully will be in Northport by June, 2023. The Yeates are seeking a commercial slip in the marina, which would most likely be at the "T" end of B Dock. This slip would be used both for the commercial charter and for transient boaters while the *Alecona* is involved with a chartered trip. This will need approval from both the Village Council and the DNR Waterways Commission.
2. **HARBORMASTER REPORT:** Installation of the AQUA Superpower charging station should begin in late August and the transformer for same has been ordered. The post-mortem on the July ¾ fuel spill has been completed. Much was learned and is documented in the Harbormaster's report. This was a minor spill caused ultimately by a defective fuel filter. Marina traffic is down in all area marinas including ours. Fuel is selling on pace with last summer or better. More diesel is being pumped than last year. The decking on C dock is warping and twisting presenting a tripping hazard. This is low quality wood (according to the project engineer for the C Dock renovation) and was the only wood available last year when the C Dock project was done. Bill will seek to replace the worst of the boards with 2X6's.
