KB questions/comments on Northport project

Main idea is to establish effective process to address concerns as they arise both during construction and after construction. Initial thoughts are below. Responses to all are not expected during this meeting but documentation of their consideration appreciated.

Issue		Suggestion	Response	Status
Communication	During construction contact point for concerns	Post contractor 24 hour info and developer/owner contact info Establish group to check progress and address changes, problems. (Planning commissioner, adjacent land owner, others)		
	Removal of trees in buffer area, hours of operation, staging of heavy equipment and worker vehicles. Stormwater			
	Post construction	Provide contact info of site manager & owner. Establish group to address changes, problems. (Planning commissioner, adjacent land owner, others)		
Adjacent owner property physical impact	Construction	Physical and procedural control of contractor traffic. Remedy for any damage.		
Maintenance		Snow removal & storage, Stormwater direction, management		

Quality of life	Occupants	1. Expectation of areas for children activities (bicycling, ball playing); 2. pet areas. 3.Laundry facilities. 4. Outdoor gathering/BBQ areas.		
	Others	1.Entrance details-curbing, speed bumps, 2. any access limitations at entrance or for residence inside area. 3.Security. 4.Maintenance of garden area
