DPW Report
September 8, 2022

Happy to report that Flees rd. sewer line is in and tested and fully functional. Flees rd. has been upgraded and re-graveled and paved at the intersection, per contract with KAL Excavating.

DPW recently responded to a water leak along Shabwasung/ M-201. This turned out to be a service (water) line for 211 Shabwasung st. Once again, KAL Excavating was instrumental in the repair of our Aging water lines along this corridor. Fortunately, we were able to have the repair area paved by Reith-Riley Co. who was in the area Paving M-201, prior to the Labor Day Weekend!

DPW recently rented a stump grinder and removed numerous stumps in our ROW and street ends.

Street and Parking line painting is complete for this season. Concerns about crosswalks on M-201, have been brought to my attention several times. This responsibility is actually a MDOT issue, and they have been contacted and have noted that they need to be addressed. Hopefully in spring of 2023.

DPW has not received a response from Army Corp Engineers, related to Village Street end beach maintenance, as of to date.

DPW assisted with traffic control for the annual Dog Parade event, which by all accounts looked to be a successful one.

DPW have been in contact with Uncaged planners, and will once again be conducting street closures and traffic control/routing for this annual event, in conjunction with EMS and Lee.Co. Sherrif.

PFAS testing of all Village Municipal wells have been completed and submitted to a State Certified lab. Results have not been received, as of yet.

DPW would like to remind the Council and Residents that this Saturday, at 10:30 am, there will be a dedication at DPW building that is our 8th st. shop, honoring Tom Botz, for his many years of service to the DPW and the Village of Northport. Please join us.

Questions or concerns?

Respectfully Submitted
Chris Holton
