Harbormaster's Report to the Village Council

December 2023

What I've been up to:

1. **Seasonal Slip Invoices** – I'll be working to prepare and update the database and assure the invoicing process is good to go for the January mailing.

2. **Waiting List Invoices** – I'll also be working to prepare and update the database for the February Waiting List mailing. At this time it appears as though we will have at least two 32-foot slips available, zero 42-foot slips, and zero 60-foot slips. I'll know more for sure by the beginning of February when the Seasonal Slip deposits are due.

3. **Projects for Summer 2024** – I've been working on developing a list of things I'd like to accomplish next summer and putting dollar signs on them. I'll share this with the Waterfront Committee later this month. I'll be working with Clerk Joni on our budget, as well.

4. **Internet & TV** – I have had the internet and TV service disconnected for the winter. This should save us somewhere in the neighborhood of $1,600/year.

5. **UST Insurance** – There is a possibility that the Village could participate in a program through EGLE Underground Storage Tank Authority that would pay for our liability insurance. I'll be researching this over the next couple of months. If true, this could save us somewhere in the neighborhood of $1,400/year.

6. **Swimming Spar Buoys** – I've been researching the addition of a number of new spar-type buoys to add to mark the swimming area at South Beach Park and Haserot Park. It's looking like we'll need at least 6 buoys and maybe 8. The best cost I've found is $160/each + freight.
