DPW Report
July 11, 2024

DPW have assisted in planting several trees around the Village in various places within the street ROW. Bob Newell has been instrumental in procuring and planting the trees, let alone raising the funds through bottle and can collecting. Thank you Bob!!

DPW would like to construct a small “pedestrian” bridge over the storm water retention area in the North Marina parking area. This would make for a much safer passage, although, it would not be made for ADA access, due to the existing curbing in place. We had hoped to have this completed before the busy summer traffic, but will likely begin in the fall, after boating season.

We have received bids for the Fourth St. drainage project. Details in Managers report.

DPW and TWP. Collaborated on dust control for our gravel roads. TWP. agreed to pay for this service, in trade for DPW grading and preparation prior to treatment.

DPW has been in communication with demolition contractor Bay - Area Demolition of TC. They have started with interior removals, and limited asbestos abatement and lead paint abatement also. DPW will continue to communicate with contractors.

DPW spoke to representative from Leelanau Energy Group, recently. We were informed that they are still moving forward with plans to removal of the “tower” from the wind turbine. DPW has removed gravel that was contaminated with 90w gear oil. More clean up To the adjacent site (old shed) will be done soon.

PK Contracting have completed the contracted amount of striping, throughout the Village. There will be some additional striping that Will be done at a later date.

Village Manager and Myself met with EGLE Representative concerning future maintenance plans for the Mill Pond dam. This will require a Permitting process that will detail scope of work and procedures.

DPW has received information and some quotes from Ginop Sales, and Equipment. We requested a cost for replacement of our existing Kubota tractor that is 10 yrs. old, that still has some value. DPW also Inquired about a small used excavator that would be a valuable asset to our equipment line up. Glad to discuss any details.

Respectfully Submitted
Chris Holton
DPW Supervisor
