DPW Report
May 8, 2025

DPW began sweeping Village streets this week, with LCRC providing Two street sweepers and a water truck. DPW staff works in concert during this annual task, with labor, equipment and trucking.

A big shout out for the successful Annual Scott Brow Fishing Derby at the Village Mill pond, provided by the Sportsman's Club members. Once again, a good time had by all who turned out for this family event.

DPW will be flushing fire hydrants beginning Wednesday, May 14, 2025. We would like to remind residents to beware of potential discoloration of their tap water. This is a scheduled exercise, done twice a year.

DPW received a new "push camera", which will be used to inspect and look at drain pipes, culverts and potential confined spaces. This will be a valuable asset, in our toolbox.

We will be working with Marina staff to prepare for the upcoming boating season. The low water levels of the Great Lakes currently will provide us with some challenges this year. DPW will be opening the South Beach-Bathrooms for the summer season, in the next week.

DPW will assist with Cars in the Park on Memorial Day weekend, May 24. There will be street closures starting at 7:00 am thru 3:00 pm. Saturday. Signage for Detour routes will be posted on the day of the event. This is the longest running auto show in Leelanau County.

Upcoming projects include dead tree removal in Haserot Park, along with stump grinding. DPW will be gathering estimates for tree work requiring special equipment, to trim or remove.
Garage Door Services will be working at our 8th st. Shop, repairing and replacing service doors, at that location.

Glad to answer questions.

Chris Holton
DPW Superintendent
