

DPW Report
October 10,2025

DPW will be conducting Fire hydrant flushing on Wednesday, October 15th. We advise residents to refrain from washing light colored articles that day, because of potential discoloration of Municipal water. This is a biannual exercise that DPW will be doing to clear out natural mineral deposits that can accumulate in the water mains. Any questions please call (231) 432-0351

Another successful Leelanau Uncaged is in the books for 2025. A very big shout out to all the Volunteers and our own DPW crew for the amazing job of set up and clean up!!

DPW staff is very appreciative of the effort that the Council and Staff, made in expediting the purchase and trade-in of the KUBOTA tractor, from Ginop Sales Inc. We received it on October 1st, and immediately noticed the improvements that have been made to the accessories and components.

DPW are currently getting up to speed on our newly implemented GIS / Silversmith system. This program is designed to help us in identifying and recording the Municipal water and Sanitary-System, along with cataloging numerous other equipment and many assets, related to Village properties.

With the closing of the Marina for the 2025 season, DPW will be Draining water lines and preparing for the winter. This will also include the closing of the South Beach restrooms, end of October.

We recently installed a stone wall along the walkway at the center (Farmers Market) parking area. DPW has been in communication with representatives from Consumers Energy, regarding street-Lights and schedule of service for several lights, throughout the Village. Some will be replaced by LED, others will be eliminated.

Sincerely

Chris Holton DPW Supervisor
