DPW Report
February 19, 2026

DPW have had a bit of a break with the weather lately. This has been a welcome relief and free up time for some maintenance. The month of January was nonstop snow plowing, it seemed.

Winter is not over yet, and DPW will be keeping a eye on the temperatures as they drop again. This is when the potential for water service lines to possibly freeze. If any residents have concerns or questions about this issue, feel free to contact DPW. DPW will issue a run water advisory, if and when needed.

Parshall Tree Service, will be doing contract work for the Village in upcoming weeks, weather permitting. As we lose our aging trees around the Village, we are very fortunate to have the funds and ability to replenish trees, throughout the Village.

Village Manager and I met with representatives from Machin Eng. discussed upcoming projects that include; Rose street culvert, also the water main upgrade between W.5th and W.6th streets. We hope to have cost estimates, in the weeks to come.

Currently, DPW is in the process of burning brush and branches at our 8th street yard. We rent a excavator for this purpose. Once again, this is weather and wind dependent.

In closing, we have received a permit for the Dam repair/ maintenance. We will work with EGLE on the timing for this project.

Respectfully Submitted

Chris Holton
DPW supervisor
